## PROFESSIONAL SUMMARY

Computer Engineering graduate from Bahauddin Zakariya University Multan (CGPA: 3.71/4.00) with hands-on experience in AI systems, computer vision, and full-stack web development. Designed and deployed an OCR-based automated exam evaluation system using OpenCV, EasyOCR, and TrOCR, and built a WhatsApp-integrated complaint management platform using Python Flask. Currently developing an AI Voice Call Agent using on-device LLMs. Seeking a role where I can apply my practical AI and software development skills in a professional environment.

## TECHNICAL SKILLS

- **Programming:** Python, C#, C++, C, MATLAB
- **Web & Backend:** Flask, Web Applications, RESTful APIs
- **AI & Computer Vision:** OpenCV, EasyOCR, TrOCR, OCR Systems, LLM-based Systems
- **Libraries:** Pandas, NumPy
- **Networking:** Software Defined Networking (SDN), Mininet, OpenFlow Protocols
- **Design & Tools:** GitHub, VS Code, Cisco Packet Tracer, MS Office, Graphic Design, UI/UX Design

## PROFESSIONAL EXPERIENCE

### Independent Projects & Freelancer

2022 - Present

*Self-Employed*

Multan, Pakistan

Independently designed and developed multiple full-stack and AI-based software projects without formal employment, demonstrating self-learning, initiative, and problem-solving ability. Delivered a functional Complaint Management System for a local waste management entity, integrating WhatsApp and Email APIs. Currently developing an AI Voice Call Agent using on-device LLMs (Gemma), demonstrating knowledge of modern AI deployment.

### Private Tutor & Digital Marketing (Part-time)

2022 - Present

*Self-Employed*

Multan, Pakistan

Managed a private tutoring service while simultaneously running targeted digital marketing campaigns on OLX and Facebook to grow client base — demonstrating entrepreneurial mindset and communication skills.

## EDUCATION

### Bachelor of Science in Computer Engineering

2022 - 2026

*Bahauddin Zakariya University*

Multan, Pakistan

CGPA:

3.71 / 4.00

### ICS (Physics, Computer, Mathematics)

2020-2022

*City College of Science & Commerce*

Multan, Pakistan

Marks:

83%

## PROJECTS

### Automated Paper Checking System

Final Year Project

*AI-Powered Handwritten Exam Evaluation*

Designed and developed a hybrid OCR pipeline utilizing OpenCV, EasyOCR, and TrOCR to accurately identify and score handwritten text, excluding printed content. Implemented complex image processing logic to seamlessly integrate frontend and backend components for fully automated evaluation.

### Complaint Management System

Full-Stack Web Application

*Waste Management Entity Platform*

Developed a full-stack web application using Python Flask and SQLite for a local waste management entity.

Engineered an automated notification system integrating WhatsApp and Email APIs to provide real-time updates on complaint statuses. Ensured high performance and database simplicity by utilizing SQLite for efficient data handling.

### Bank Management System

Desktop GUI Application

*C# .NET Windows Forms Application*

Built a comprehensive desktop GUI application using C# and .NET Windows Forms. Implemented secure features for handling customer transactions, processing loan requests, and generating real-time dashboard summaries.

## LANGUAGES

**English** - Professional working proficiency

**Urdu** - Native or Bilingual
